

METHOD AND SYSTEM FOR PROVIDING INTEGRATED REMOTE  
MONITORING SERVICES

5 ABSTRACT OF THE DISCLOSURE

A method and system for providing integrated remote  
monitoring services includes receiving and storing radio  
frequency identification (RFID) data from an RFID system  
at a remote facility of a subscriber. Video data is  
10 received from a video system at the facility and also  
stored. The subscriber is provided with access to the  
stored RFID and video data. The subscriber is also  
provided with access to and control of a video camera in  
the video system at the facility.
